

MORE WINDOW – MORE LIGHT
With Euro Design 70

Simply more
joie-de-vivre

LARGER GLASS PANES

More sunshine

Euro Design 70 are window profiles that suit a tight budget and let in even more light: designed with particularly slim sightlines, there is more room for glass. Enjoy great views – since sunshine not only improves your health, it also lifts your mood. And Euro Design 70 makes interior design a pleasure: the wide selection of colours and mouldings leaves plenty of scope for creativity. Personalised windows add the final touch to the look of your house – so you'll always be happy to come home. Wherever you are.

More sunshine, better health

- Helps fight the winter blues
- Leads to the release of endorphins
- Can boost the immune system and strengthen bones
- Lowers blood pressure
- Invigorates the breath and metabolism

NUMEROUS COLOURS AND MOULDINGS

More possibilities

KALEIDO COLOR* gives you plenty of scope for style. Any trendy tone can be implemented – laminated, foil-coated or with aluminium casing – so you can create your dream design. Choose from an assortment of structured finishes, or a gloss or matt look. Plenty of inspiration to brighten up your home.

In great shape

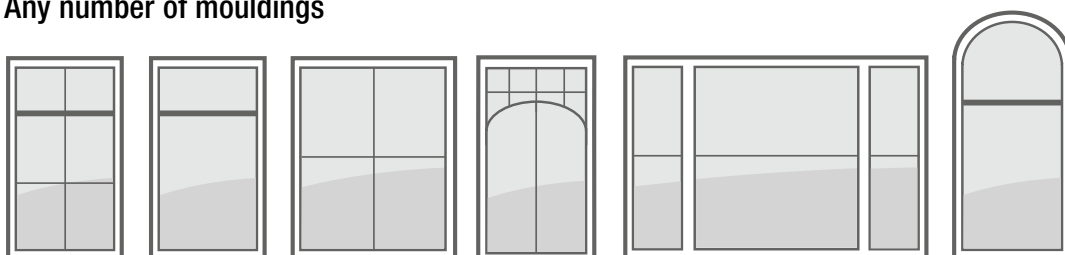

Euro Design 70 is available with a wide range of mouldings, rounded, angled or with sash bars – your window profiles can make the most of the view.

Any number of mouldings

LOWER ENERGY LOSSES

More savings

70 mm construction depth and double seal keep your home warm and cosy, even when it's stormy or snowy outside. This keeps your heating costs in check.

Burglary prevention	up to resistance class RC 2

44 dB less noise

for peace and quiet

EXCELLENT INSULATION

Optimum sound insulation

With Euro Design 70 you can really turn up the volume – or switch it off. Feel at ease whether the sound is inside or outside. Your windows let in plenty of light but hardly any noise. And can be customised exactly to your needs depending on where you live and the level of noise pollution. Euro Design 70 windows with a noise reduction value of 44 dB are an ideal solution even for homes on busy main roads carrying 30,000 vehicles a day.

SIMPLY MORE RESISTANCE

For added security

Feel safe and secure in your home. Even at night, Euro Design 70 windows help keep you safe. These profiles are available in various break-in resistance classes to suit your situation.

The special locking elements and further security components mean that the level of burglary prevention provided by each individual Euro Design 70 window can be separately adjusted.

Burglary prevention
to your specifications

Just
my
window.

Euro Design 70

The plus points at a glance:

- Maximise incident light
- Enormous range of colours and mouldings
